Why Livestock Matters

- Livestock provides food, income, and employment. It contributes to national food security and livelihoods.

Types of Livestock

- Poultry, Goats, Sheep, Cattle, Pigs, Rabbits, Fish

Farm Setup Requirements

- Land, water, housing, equipment, biosecurity, feed storage

Poultry Management

- Brooding: 0–2 weeks, Grower: 3–5 weeks,
Laying: starts at 18–20 weeks

Goats & Sheep

- Feeding: hay, legumes, salt licks. Breeding: every 8 months. Vaccines: PPR, FMD

Cattle Management

- Dairy: 10–20L/day. Beef: Fattening up to 350kg. Vaccines: BQ, Anthrax

Pig Farming

- Gestation: 114 days. Weaning: 6–8 weeks. Use of farrowing crates

Fish Farming

- Stock: 100–200/m². Harvest in 4–6 months at 800g–1.2kg. Monitor water quality

Feeding Systems

- Balanced feed = Energy + Protein + Minerals + Vitamins. Use feed charts

Disease Management

- Vaccination, deworming, hygiene, quarantine for new animals

Breeding and Reproduction

- Heat signs, AI vs Natural Mating, pregnancy care

Harvesting & Processing

- Harvest by weight or age. Practice hygienic slaughter & packaging

Marketing Strategy

- Sell to local markets, online, restaurants. Use Agri_Empower platform

Farm Records

- Use logs for feed, health, sales. Consider digital tools or apps

Sustainability

- Integrate with crops, use solar & bio-digesters, reduce waste
